PRECISION LUBRICANTS

**Helping You  
Solve Lubrication  
Problems**

# OUR PRODUCTS

## Tired of Lubrication Problems?

We are, too! At Davley Darmex Lubricants, we understand that in today's competitive environment, production machinery must run longer and under more extreme operating conditions. These higher demands are resulting in unexpected production downtime, increased repair costs, more frequent maintenance requirements, and an overall decrease in machine life expectancy. What does all of this mean for you? It's costing you money. Lots of it.

## Let us help!

Faced with these conditions, choosing the correct lubricant can be difficult. The extreme conditions of temperature, pressure and contamination compound the problem and create unique circumstances for every application.

Our dedicated team of Application Support Specialists is standing by with all of the product and technical information you need to help you select the best possible product for your specific application.

## Our Philosophy

Providing precision lubricants and lubrication solutions supported by industry-leading technical, application and customer support is what we are all about. This is our commitment to you.

**W**hen it comes to severe needs and problematic applications, first and foremost it is critical to have a product that will *exceed your performance expectations*. Our lubricants are individually designed and carefully manufactured to deliver the performance and protection you demand from your equipment.

At Davley Darmex Lubricants, we supply precision lubricating products using synthetic base fluids and highly refined and hydrocracked paraffin-base oils blended with chemical and metallic additives.

What makes us different are the exclusive production methods, techniques and formula sequences that we use to combine these carefully selected ingredients successfully into a finished product that is uniquely formulated to maximize the benefits for a given application. The entire sequence is complementary and chemically compatible so that the final product offers true synergy. The result: a superior, fully-formulated and modern lubricating product that will simply. . . Perform.

## Product Features:

- Extreme temperature protection (-90°C to 350°C)
- Extreme pressure, load, and anti-wear characteristics
- Superior chemical, thermal and oxidation stability
- Excellent boundary lubrication
- Very low pour-points, low coefficients of friction
- High film strength, high flash / fire points
- High viscosity indexes
- Superior rust and corrosion protection
- Excellent surface and shear stability
- Fully compatible with metal / nonmetal components and other lubricating products
- Excellent water, saltwater, washout and steam resistance
- Non-drip formulas that resist fling
- Full range of food-grade and non-toxic formulations

**Extreme Temperatures**

**Extreme Pressures**

**Dirt & Contamination**

## Product Benefits:

- More efficient and effective lubrication
- Reduced or eliminated incidents of unscheduled production downtime
- Extended machine and component life
- Extended lubrication intervals
- Lower disposal costs
- Reduced noise and operating temperatures
- Reduced power consumption
- Savings from less frequent machine repair
- Multi-grade formulations available for product consolidation and inventory savings
- User and environmentally friendly products

# OUR SERVICES

**P**roviding precision lubricants is only half of the battle. Properly matching the correct lubricant to your unique set of application circumstances is the other half.

Matching a specific product to a specific application is one of the most important services our team of Application Support Specialists offers. ***Application Support is a critical element of our commitment*** to providing you with "Precision Lubricants and Lubrication Solutions".

The primary role of Application Support is to provide you with the information required to make informed decisions about how to solve your lubrication challenges. Our extensive network of world-class suppliers, coupled with our in-house lubrication knowledge and our industry experience, enables us to match specific products with specific requirements. In addition, we offer an outstanding level of customer service which ensures that you will receive prompt attention on all inquiries and on-time deliveries from available inventory.

**Washout Conditions**

**Non-Toxics**

**Food Grades**

## The Application Support Function:

- To provide detailed product information and material specifications
- Product Interchanges
- Alternative product recommendations
- Custom formulations
- Sample materials
- Prototypes for new applications
- A friendly ear to discuss ideas and possible solutions

At Davley Darmex Lubricants, we recognize that Application Support is about developing an on-going relationship with you to provide support and information for all of your lubrication requirements. Our experience with OEM engineers, maintenance supervisors and industry specialists gives us a large base of experience to draw upon.

With a successful combination of our precision lubricants and lubrication solutions, we are confident that you will see improvements in your overall machine performance and a decrease in unexpected production downtime. We can help to save you money.

## Industries Served

- Automotive
- Aircraft
- Asphalt
- Bakery
- Beverage
- Chemical Plants
- Dairy
- Food Handling Industry
- Forestry
- Glass Forming
- Injection Molding
- Masonry
- Mining
- Marine
- Packaging
- Paint
- Pharmaceuticals
- Power plants
- Pulp and Paper
- Steel Mills / Foundries
- Textiles

## Equipment Served

- Air Lines
- Bearings
- Bottling Equipment
- Casters
- Chains / Chain Drives
- Chillers
- Compressors
- Construction
- Conveyors
- Fans / Blowers
- Farming
- Freezers
- Gearboxes
- Hydraulics
- Industrial Machinery
- Kiln Cars
- Knitting Machines
- Open Gears
- Ovens
- Slide Guides
- Spindles
- Turbines
- Vacuum Pumps
- And many more!

D LUBRICATION SOLUTIONS

## Additional Services

We are pleased to offer a range of additional services including:

- Custom oil and grease formulations according to your exact specifications and requirements
- Small batch manufacturing capabilities with rapid turnaround to ensure delivery when you need it
- Generous Canadian inventories with next day delivery services across the country for regularly stocked items
- An extensive distributor network
- Samples available for prototypes and testing
- Other lubricating products and services including aerosols, dispensing equipment, plant surveys and oil analysis

## About Us

Davley Darmex Lubricants is a wholly owned and operated Canadian company with Head Offices located in Mississauga, Ontario. For 35 years, our company has been proudly supplying precision lubricants and lubrication solutions to our customers.

At Davley Darmex Lubricants, you will find dedicated Application Support Specialists ready to tackle all of your lubrication challenges, offering precision lubricants manufactured using state-of-the-art processes, the latest in component technology, and industry-leading application support and customer service.

## Contact Information

Our regular business hours are 8:00AM to 5:00PM (EST), Monday to Friday. Special after-hour, weekend and emergency contact numbers are available should you need to speak with an Application Support Specialist outside of regular business hours. Please inquire through our Head Office for additional information.
